## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.  
PCT/KR2004/002923

## Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims	1-27	YES
	Claims		NO
Inventive step (IS)	Claims	1-27	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-27	YES
	Claims		NO

## 2. Citations and explanations (Rule 70.7)

## A. Novelty and Inventive step

The invention provides a method of managing resources allocated for a HSDPA service in a mobile communication system including an RNC which allocates resources for the HSDPA service and a node B which includes at least one local cell for providing the HSDPA service using the allocated resources among a plurality of local cells.

Specifically, the method comprises the steps of

- (a) determining on, at the Node B, if the local cells support the HSDPA service, and
- (b) transmitting resource status information indicating an availability of the HSDPA service to the RNC according to the determination.

The following documents are made for references:

D1: Load sharing in hierarchical cell structure for high speed downlink packet transmission  
(17–21 November 2002)

D2: WO 02/102109 A1 (19 December 2002)

D1 shows a load sharing strategy between an umbrella microcell and overlaid picocells for high speed downlink packet transmission.

D2 shows a handover and Fast Cell Selection (FCS) technique in HSDPA.

Though these documents are related to a HSDPA service, neither of these documents nor any combination of these documents teaches or fairly suggests the main characteristic of the present invention; Managing the HSDPA resource on the basis of the number of local cells and/or the local cell capabilities.

Consequently, claims 1–27 meet the criteria set out in PCT Article 33 (2)–(3).

## B. Industrial applicability

The present invention including claims 1–27 suggests a method that can be used in a mobile communication system, thereby meeting the criteria set out in PCT Article 33 (4).
